WHAT TO DO

- Vacuum often with a soft brush, always in the direction of the pile: it's the most important thing you can do for a velvet.
- Like all velvets, the pile changes shade depending on its direction: it's a natural effect, not a defect.
- If there's a stain, blot with a dry white cloth, without rubbing so you don't flatten the pile.
- If needed, wash the cover at 30° on a gentle cycle; no tumble dryer, iron on a low heat.

Always follow these instructions: we cannot accept responsibility for problems caused by washing methods or products other than those indicated.

Your sofa will thank you.
